

**Commercial - Industrial - Institutional**  
**HVAC - Chillers - Cooling Towers - System Design**

We at Monadnock Cooling Systems would like to address the issue of the COVID-19 virus to our valued clients. As the days progress we are hearing of more and more companies closing their doors temporarily to prevent the spread of this virus. We also realize that equipment issues at your facility may arise during this time. For the time being, we will remain open to continue to assist you and your facilities needs.

Rest assured, all precautionary measures will be taken to ensure the health and safety of everyone at your company and of course our own employees well being. Monadnock Cooling Systems is well equipped with PPE (Personal Protective Equipment) gear to help minimize outside exposure in your business. Should you require service, please state any necessary precautions you would like us to take while on your site; respirators, gloves, use of a certain entrance etc. We will do our best to ensure those requests are met and that we are prepared before arriving.

We will continue to have our on call 24/7 technicians available for emergency situations. We will notify you if this status should change. We will continue to post updates on both our website and our Facebook page.
